FOREWORD

This historical summary of X US Army Corps is for the Calendar Year 1964. Efforts were directed to give proportionate coverage and to present an accurate, objective account of all Corps activities.

Organizations and units assigned to X Corps during the year that were authorized an organizational color or a distinguishing flag or guidon, conducted and reported their own command historical programs.

CHAPTER 1

ORGANIZATION AND ADMINISTRATION

SECTION I - STATEMENT OF MISSION

The mission of the Commanding General, X United States Army Corps, a Class I activity under the Commanding General, Sixth US Army is to:

Command all active Army personnel assigned or attached to Corps Headquarters, Sector and Subsector Commands, Senior USAR Advisors to General Officer Commands, United States Army ROTC Instructor Groups and United States Army Reserve personnel in the states of Idaho, Montana, Oregon, Utah and Washington.

Supervise and coordinate all Army Reserve affairs in the Corps area that are a functional responsibility of the Army Commander, to include personnel procurement, organization, training, administration, inspection and supply.

Supervise and coordinate all ROTC affairs in the Corps area that are a functional responsibility of the Army Commander, to include personnel procurement, organization, training, administration, inspection and supply unless specifically exempted by directives issued by higher headquarters, e.g., ROTC Camp, Instructor Orientation Course, Flight Training Program, ROTC participation in Camp Perry Rifle Matches, etc.

Assist the Army Commander in determining logistical requirements in the operation of the Corps.

Assist the United States Army Reserve Units in the procurement of supplies and equipment necessary to accomplish their mission.

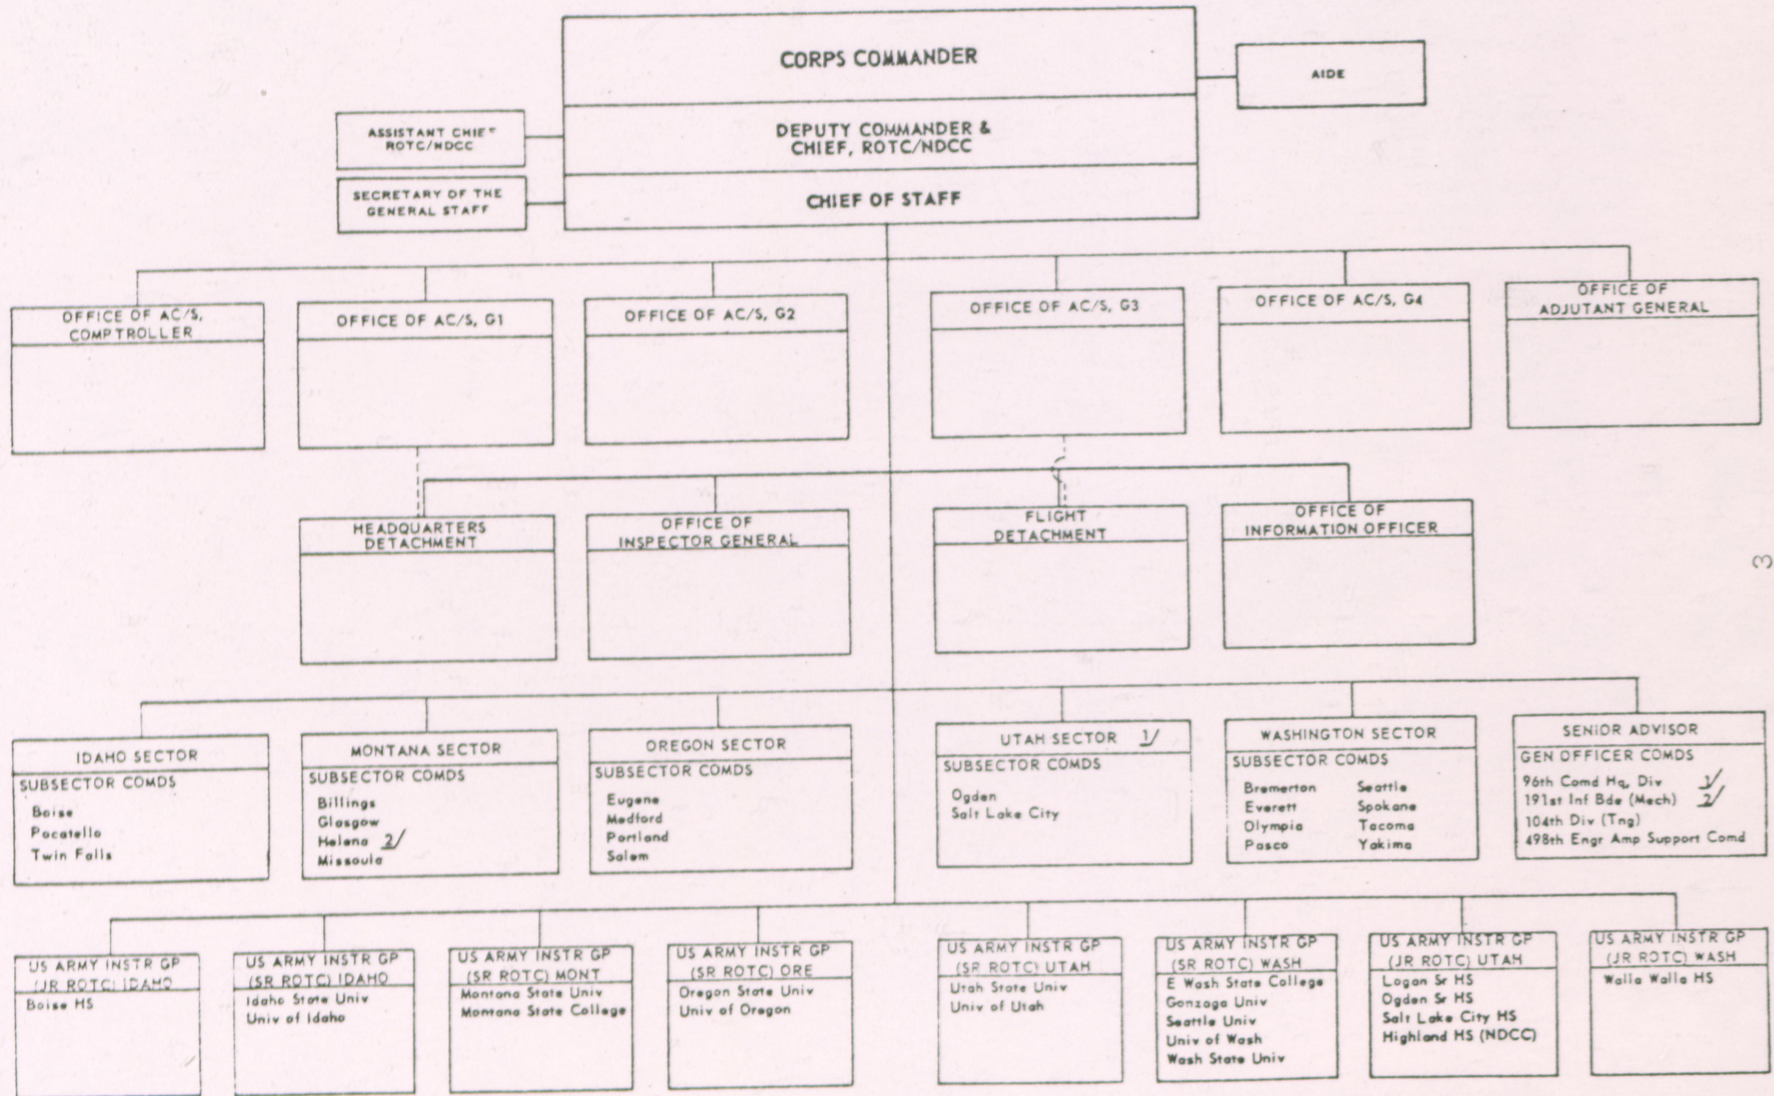

Assure that each United States Army Reserve unit or activity has adequate facilities for proper storage, safeguarding and maintaining such property as may be issued to the activity within authorized allowances; and determine the ability of the unit to utilize profitably such property for the training program, or for such other missions as may be assigned.

Prepare, coordinate and implement when appropriate, plans for civil defense, mobilization, internal security, contingency operations, and other functions as directed.

Operate a headquarters to support the foregoing missions.

SECTION III - PERSONNEL

Fluctuation in authorizations and assigned strengths of both military and civilian personnel characterized 1964. The net result of those fluctuations was an increase both in the Corps' personnel authorization and in the number of assigned personnel. The increase in the total assigned strength, however, was due primarily to increases in civilian strength; the total of assigned military personnel declined during the period.

The year began with Corps having an authorized strength of 183 officers, 288 enlisted men and 381 civilians and an assigned strength of 169 officers, 321 enlisted men and 333 civilians. This first of the year base was changed in March, April, July and November and resulted in a year-end authorization of 197 officers, 299 enlisted men and 400 civilians with an actual assigned strength of 168 officers, 296 enlisted men and 405 civilians.

The manning criteria for USAR technicians was revised by higher headquarters during November and authorizations within categories of technicians simultaneously altered. As a result, it became necessary to realign USAR technicians by category of unit to which assigned. Higher headquarters was notified of the realignment and USAR commanders notified of their new technician authorizations. Additionally, over-strength and attrition provisions of previous guidance were revoked and the Headquarters was advised that total technician strength must be reduced to that authorized not later than 30 June 1965. This action

will necessitate the relocation and transfer of numerous civilian technicians and, in all probability, reduction in force action in some instances.

The Corps maintained a favorable relationship between authorized and assigned strengths of military personnel, with the percentage of fill varying between 91 percent and 104 percent. This relationship was attributable, primarily, to overages of enlisted personnel created by Table of Distribution changes in MOS and grade structure which rendered many surplus; requisitions against those changes were often filled before attrition of surplus personnel was achieved.

Officer shortages were most severely felt within advisor activities. Although authorizations at that level were increased from 67 to 80 during the year, numerous requisitions remained unfilled and assigned strength fell from 65 to 55 during the same period. At Corps headquarters, the percentage of assigned to authorized strength varied from 89 percent to 100 percent. This favorable picture was, however, distorted by an actual shortage of field grade officers and an overage of lieutenants.

Since the ROTC Instructor Groups enjoy a high priority for personnel assignments, few areas of concern normally develop at that level. One exception was noted in the case of the Professor of Military Science position at Montana State University which remained unfilled throughout the fall term. This situation resulted from the University president's rejection of nominations submitted by Department of the Army. Temporary coverage of this position until the scheduled arrival of a replacement

in January 1965 was provided by Headquarters, Montana Sector Command.

Safety services support received from US Army Garrison, Fort Lawton, were substantially reduced during the year as a result of the reduction in authorization for safety personnel at that headquarters. Staff visits to units on ANACDUTRA and safety surveys at home stations of assigned units were, resultantly, curtailed. Continuing emphasis on accident prevention during 1964 resulted in a reduction in incidents from 45 to 26 and accident costs from \$100,500 to \$76,000.

Effective in February, enlisted members of the USAR were authorized to participate in the ARNG OCS Program. Thirty-five reservists in the five-state area have taken advantage of this opportunity to obtain a commission. The fact that USAR members are not automatically commissioned upon completion of the course is an inequity that works to the disadvantage of USAR personnel and has precluded wider participation.

A USCONARC quality control team visited Corps 23-27 March for the purpose of assessing error rates in non-unit Ready Reserve records and to assist in records-keeping procedures. Report of findings indicated that X Corps had few critical personnel record discrepancies and that records were in an exceptionally high state of maintenance.

On 24 March the Corps was required to commence operation under the new USAR Administrative System (Corps Prototype). This new system caused reorganization of the Reserve Personnel Division to conform to a standard organization chart, realignment of personnel, changes in most operating procedures, and retraining of personnel to handle newly

assigned tasks. It added many procedural requirements in USAR administration and established a data control office with primary function of subjecting personnel data to a verification for accuracy prior to entry into punched card files. Seven training sessions of approximately two and one half hours each were conducted for personnel prior to actual implementation of the system. All procedures have been operational since August.

The Reserve Reinforcement Processing Center, established at Fort Irwin, Calif., to serve as a focal point for accomplishment of administrative and logistical processing of individual reinforcements ordered to ACDUTRA, was furnished a liaison officer to serve as technical advisor for inprocessing of Reserve reinforcements and another for out-processing; both were staff members of the Reserve Personnel Division.

Beginning in May, the Unit Personnel Office published guidance on a recurring basis relative to correct preparation of travel vouchers, in an effort to reduce the high percentage of errors in their submission. As a result, there was a 95 percent decrease in the number of travel vouchers returned to the field for resubmission, virtually eliminating the serious morale problem caused by delayed payment in other years.

Elimination of overstrength assignments resulting from USAR reorganization and realignment under RCTB-64 by 1 May anticipated the reassignment to control groups of approximately 21 field grade officers, 14 company grade officers, 44 warrant officers, and 7 enlisted personnel. Most of these individuals were career reservists desirous of

continuing in a Ready Reserve unit assignment. An exception granted the 96th Command Headquarters and concerted effort throughout the command to reassign such personnel reduced these figures to a minimum.

The Corps Augmentation Detachment was used during scheduled drills on productive tasks throughout the year. ANACDUTRA for this unit was programmed in four separate increments. During the months of June and July, an administrative team was on duty at all times and participated effectively in preparation for Exercise READY CHECK.

During the past year, much emphasis has been placed on the condition of the records of reservists assigned to the Ready Reserve Mobilization Reinforcement Pool (RRMRP). The entire personnel resources of the RPD were directed toward updating punched card machine data during July in preparation for Exercise READY CHECK.

In August, Exercise READY CHECK was conducted by DA to measure the accuracy with which records of Reserve personnel are being maintained by the Corps based upon an audit of punch card information, individual personnel records data and personal information verified by selected reservists.

While it was believed that records in this headquarters were in an excellent state of readiness, results of the audit did not bear this out. Machine errors contributed heavily to the error rate. Among the 14 Reserve Corps, X Corps' overall evaluation was average.

In September, this headquarters assumed responsibility for conduct of investigation, publication of orders, and reporting AWOL's for apprehension for enlisted members of the ARNGUS subject to ACDUTRA enforcement

tours. The impact of this additional mission has been relatively small as only six members were placed on orders from September through December.

The Reserve Components Enlisted Evaluation System was implemented in X Corps beginning with the November MOS evaluation test period, culminating several months of planning and development. Responsible personnel from the Reserve Personnel Division attended a pre-test liaison-orientation conference conducted at Presidio of San Francisco on 1 June.

During 1964, the Adjutant General Section received 58 inquiries from members of Congress submitted on behalf of reservists assigned to the Corps.

The majority of these complaints dealt with Reserve obligations, personal hardship and attendance at summer camp. Nearly all complaints were unjustified owing to the fact that fulfillment of Reserve obligations and attendance at summer camp are statutory requirements, and the individual concerned did not have sufficient compelling reason to warrant a change in position.

The Saving Bond Program participation rate rose from 69 percent participation on 1 January to 80 percent participation at the close of the year.

Internal reviews and organizational and procedural surveys were conducted on a scheduled basis; and the following organizational changes effected:

1. Established the Deputy Corps Commander as Chief of ROTC/HIDCC with an assistant chief.

2. Assigned the Utah Sector Commander and the Helena Subsector Commander additional duty as Senior Advisors of the 96th Operational Headquarters and 191st Separate Infantry Brigade, respectively.

During the year increased emphasis was placed on the early detection of personnel whose access to classified information was inimicable to the interests of a sound security system. A positive program for the suspension or revocation of security clearances was disseminated to all unit commanders and supervisors by letter this headquarters, AINOXC-2, 15 January 1964, subject: "Suspension of Access to Classified Defense Information," in accordance with instructions received from the Chief of Staff, US Army in DA Message 950661, 7 January 1964. This program has resulted in the immediate suspension from access to classified defense information of those members of X US Army Corps suspected of misconduct, mismanagement or mental or emotional instability.

An entirely new personnel security action program was initiated by Project Security Shield. Effective 19 December, all requests for security investigations originated within X US Army Corps are forwarded directly to the U.S. Army Intelligence Corps Command, Fort Holabird, Md. This program eliminates processing of clearances through intermediary headquarters and will result in a more efficient and responsive security clearance program.

With implementation of Security Shield, Professors of Military Science will be granted authority to issue Certificates of Clearance for ROTC applicants for US Army commissions based on favorable National Agency Check results. Professors of Military Science will also assume

responsibility for resolving any unfavorable suitability investigations, subject to review by this headquarters.

All personnel attending schools requiring a clearance were granted necessary clearance before departing from this headquarters.

The responsibility of indicating security clearance on orders, school attendance and other actions was placed on the Custodians of Records, rather than G2 Section.

The several Department of Defense announcements on realignments and major reorganizations had a major effect on personnel, particularly civilians, during the year. After more than a month of rumors, official announcement was made 24 April that Fort Lawton, site of X Corps headquarters, would be phased out by July 1967 and the Corps headquarters would be relocated at Fort Lewis. In November another announcement included Fort Douglas, Utah, headquarters of Utah Sector and the Salt Lake City Subsector of X Corps, on the list of sites to be closed by the same date.

On 12 December the Secretary of Defense announced his intention to realign the Reserve component structure by transferring the unit structure of the Army Reserve into the National Guard and the elimination of the 14 Corps, including X US Army Corps.

All of these announcements had their effect on personnel, causing career civilians to replan their future and start looking for suitable jobs. Some have already departed and at the same time the flow of replacements, both military and civilian seems impaired.

MAJOR GENERAL WILLIAM CARL GARRISON

William C. Garrison was born in Alfalfa County, Oklahoma on 8 January 1910. He was graduated from Oklahoma University in 1932 and subsequently was an engineer with the Anderson-Prichard Oil Corporation of Oklahoma City.

He entered military service in the Oklahoma National Guard while a student at Oklahoma University and entered active duty as a Captain of Field Artillery with the 45th Division on 16 September 1940. In 1942 General Garrison became instructor of Tactics in the Field Artillery School and later activated and trained an 8-inch howitzer battalion at Fort Ord, California. He moved the battalion to Europe in early 1944 where he was assigned to General Patton's Third Army. He became Assistant Corps Artillery Officer of the XII Corps in November 1944, and after VE Day, took the 410th Field Artillery Group.

In the summer of 1946, General Garrison became Chief of the Tactics Section of the Engineer School where he remained until 1948. During the period 1948 to 1952 he was Assistant G1 of USARCARIB in Panama.

He attended the Army War College in the Class of 1952-53. For four years after that, until 1957, he was in the Pentagon in troop program work in G1, and as Military Assistant to the Under Secretary of the Army. He later served a year in Korea with KMAAG; the greater part of the time as advisor to the Commanding General V ROK Corps. Upon return to the Continental United States, he was Chief of Staff and later assumed command of the Second United States Army Missile Command in Fort Hood, Texas and Fort Carson, Colorado. On 15 May 1960 he became Assistant Deputy Chief of Staff for Operations, Plans, and Training of Headquarters, United States Continental Army Command, Fort Monroe, Virginia.

In Europe, during the period 21 June 1961 to 14 February 1963, he was the Commanding General, 24th Infantry Division Artillery. On 23 February 1963 General Garrison assumed command of the VII Corps Artillery. On 16 January 1964 General Garrison assumed his present position as Commanding General of the X United States Army Corps.

Personal Data

Date and Place of Birth - 8 January 1910, Alfalfa County, Oklahoma

Parents - Father: deceased; Mother: deceased

Marriage - Date: 4 June 1933
Wife: Jessie Dunham Garrison
Children: Mrs. Sharon Lias
Mrs. Mary Johnston
Mrs. Linda Clifford

Official Home Address - Albuquerque, New Mexico

EDUCATION

University of Oklahoma - 1932
Field Artillery School, Battery Officer Course - 1941
Field Artillery School, New Division Officer Course - 1943

CHAPTER 2

MAJOR ACCOMPLISHMENTS

SECTION I - TRAINING AND EXERCISES

Throughout the year, the total assigned X US Army Corps Ready Reserve strength figure remained in the close proximity of 27,700. Approximately 12,600 were assigned to troop program units. (See Appendix I)

During the training year 1963-1964 an increased effort was made by all USAR units to improve their mobilization readiness posture. Several means were used to accomplish this objective. An increase in requests from units to conduct consecutive multiple drill type training assemblies were received at this headquarters. Three units, with a combined strength of 220 assigned personnel, elected to participate in a program requiring all training assemblies to be of the multiple drill type. The 136th MI Detachment (ACR) was airlifted by a US Marine Corps Air Reserve unit from home station to an adjacent state for weekend training with a National Guard Armored cavalry regiment. Actions indicated above provided units with increased training time for field operations.

Twenty-three installations throughout CONUS, one in Hawaii and one in Alaska, were used to provide the best feasible ANACDUTRA training sites. As of 31 October, 3,231 officers and 10,647 enlisted personnel, for a total of 13,878 individuals of this command, participated in ANACDUTRA training.

The four General Officer Commands performed their ANACDUTRA calendar year training at the installations indicated below:

96th Command Headquarters, Divisional, with most of the assigned units, Fort Lewis, Wash., 15-29 August.

104th Division (Training)(-) Camp Roberts and Fort Ord, Calif., 27 June - 11 July.

191st Infantry Brigade (Mech)(-) USSTRICOM Exercise, DESERT STRIKE, vicinity of Fort Irwin, Calif., 9-23 May.

498th Engineer Command (Amphibious Support) Fort Lewis, Wash., 15-29 August.

Major highlights of training accomplishments by USAR units during this year involved the 191st Infantry Brigade (Mech) in exercise DESERT STRIKE, with a reinforced infantry battalion consisting of:

H/H Company reinforced battalion

Infantry battalion

Artillery battalion minus one firing battery

Tank company

Support company

Engineer platoon

Drop outs of assigned personnel who could not participate in the exercise performed their ANACDUTRA at Fort Irwin, during the period 27 June - 11 July. After-action report of exercise DESERT STRIKE indicated a favorable analysis of USAR participation in the exercise. The 191st elements were assigned to Task Force PHOENIX. In addition to the 191st Infantry Brigade units, the 379th APU (Type F) was assigned

to Task Force MOJAVE and participated during the period 16-30 May. The 382d QM Battalion, HHD, participated during the period 9-23 May with assignment to NEUTRAL Force.

The 17th Special Forces and 539th Signal Company were designated for airlift program SKY THRUST and performed ANACDUTRA CY 64 in Alaska and Hawaii respectively. The 17th Special Forces strength for the movement was approximately 200. They were airlifted by a Reserve Air Force unit. Maj. Gen. W. J. Sutton, Chief, Army Reserve, Department of the Army, accompanied one of the elements on the flight to Alaska. Strength of the 539th Signal Company was 121 individuals with the support being furnished by a National Guard air unit.

The annual unit performance evaluation, conducted by active Army personnel during the ANACDUTRA period rated the performance of the USAR units under the jurisdiction of this headquarters in the Excellent and Superior bracket. No unit received an Unsatisfactory rating. The most common deficiencies recorded were failure of units to attain the required strength and MOS qualifications. A total of 254 X Corps units attended ANACDUTRA CY 64.

In September, AR 135-8, dated 18 August, "Reserve Component Unit Readiness" was distributed to the field for implementation. Cardinal point of this regulation is that it changes the evaluation of a unit from a mobilization readiness analysis, to that of a capability to meet announced deployment objectives. In addition, subject evaluation will be made on a semi-annual basis instead of annually.

During the year the Inspector General Section completed annual general inspections, FY 1964, of USAR units and subordinate active Army headquarters within X Corps' area of responsibility. Additionally, for the first time, the Section performed annual formal inspections of ROTC and NDCC units, and annual general inspections of active Army instructor detachments at universities, colleges and high schools in Washington, Oregon, Utah, Idaho and Montana.

After completion of FY 64 inspections, a new consolidated annual general-command inspection system was implemented. Fiscal Year 1965 inspections were begun in September and were approximately 35 percent completed by the end of the calendar year.

Three X US Army Corps "Items of Command Interest" were approved by the Commanding General for incorporation into FY 65 inspections. These three items, dealing specifically with recruiting and retention of personnel; USAR training; and maintenance records and procedures were published in X Corps circulars and were accorded special emphasis during inspections.

Three formal investigations were completed during the year, 14 complaints were processed and 37 requests for advice or assistance were resolved.

Members of the section also served as project officers for the annual general inspection of Headquarters, X US Army Corps, conducted by USCONARC 4-8 May 1964. One officer of the section was designated Corps liaison officer to USAR units during a two-week period of annual field training at Fort Lewis. As directed by the Commanding General,

inspectors general of the section also conducted inspection of non-appropriated funds of various garrison activities at Fort Lawton.

Education

During 1964 approximately 1,670 reservists in X Corps area attended Army service and Army area schools compared to 1,700 for calendar year 1963.

Reservists attended following courses: Career refresher, basic Orientation, Associate Career, and Associate Command and General Staff. In addition to these career type courses, reservists were provided specialized training in order for them to carry out more effectively their reserve assignments. Examples of this specialized training were the following courses: Method of Instruction (for USAR school instructors primarily), Modern Warfare Orientation, CBR Weapons, Communist Strategy, and medical short-term courses as well as National Security Seminars. Enlisted personnel attended similar courses with primary emphasis on MDS training. In addition, officer and enlisted personnel of 17th Special Forces Group attended airborne training at the Infantry School, Fort Benning, Ga.

Officer and enlisted personnel also attended school courses at Fort Lewis. Approximately 256 quotas were allocated during the year for personnel of this command to attend the Equipment Records System course. In addition, Fort Lewis has a CBR department and a Noncommissioned Officer Academy in which X Corps personnel have participated.

Approximately 131 reserve personnel attended Sixth Army Area intelligence school, conducted at Fort Ord during the summer. This

headquarters has also provided instructor personnel for the school. A total of 43 personnel have attended a special recruiting course for Reservists conducted by the Adjutant General School.

The newly designed personnel and administration course conducted by the AG school for enlisted advisors and units was attended by 65 X Corps personnel. This number includes civilian administrative assistants.

One National Security Seminar sponsored by this Corps was conducted at Logan, Utah, during 27 April - 8 May and another was held at Aberdeen, Wash., during the period 4 - 15 May. Total of 119 personnel attended these two seminars. Seminars were conducted under jurisdiction of Industrial College of the Armed Forces.

The six USAR schools in the X Corps area (Boise, Fort Douglas, Portland, Spokane, Tacoma, Seattle) conducted Career and Associate Command and General Staff courses as well as enlisted MOS classes. At the present time, there are approximately 925 students enrolled in these 6 schools in an assigned, attached or auditor status.

Marksmanship

During 1964, X Corps conducted its annual rifle and pistol elimination matches in preparation for participation in Sixth Army and higher level matches. In addition, X Corps USAR personnel participated in several NRA and regional matches. Several of these matches included competition with local civilian teams. Unit and individual participation in these matches was considered excellent.

The 1964 X US Army Corps Rifle Match was conducted 28 February - 1 March and the pistol match during 13-15 March at Fort Lewis, Wash. A total of 154 personnel participated in the rifle matches and 100 personnel participated in the pistol matches. Classification used was similar to that used in 1963 consisting of open, advance, intermediate and novice classes. In addition, a fired team match was conducted with one team per sector command and one team per general officer command.

A small arms firing school was conducted prior to the matches utilizing personnel trained at National or Sixth Army Matches as instructors and coaches.

Support requirements for both rifle and pistol matches to include ranges, billeting, messing, and limited support personnel were made available to X Corps by Fort Lewis. Support was accomplished in a superior manner.

The X Corps Matches were a marked success. As a result of the matches, a total of 38 rifle and 32 pistol shooters qualified and were sent to participate in Sixth Army Matches as X Corps representatives. Of these, 13 rifle and 9 pistol shooters qualified in Sixth Army Matches for participation in National Matches at Camp Perry, Ohio.

X Corps is represented by 13 members on the Sixth Army Reserve rifle team and by 9 members on the pistol team. The rifle team won 43 medals in individual matches and the pistol team won 66 individual awards. In addition, the pistol team captured three team awards, the most significant being the Coast Guard Memorial Trophy in the National Trophy Team Match.

X US Army Corps marksman participated in the following matches during 1964.

Match	Number of Participants	Man-Day Spaces
X Corps Rifle	154	520
X Corps Pistol	100	329
Sixth US Army Rifle	38	405
Sixth Army Pistol	32	367

Reserve Officers' Training Corps

The 1964 enrollment in the basic course (MS I and MS II) senior division ROTC at the 13 colleges and universities was 4,682; the enrollment in the advanced course (MS III and MS IV) was 1,207 cadets. In 1964, 488 were commissioned second lieutenants in the USAR. Total enrollments in the basic course at the 13 senior division units for school year 1964-65 is 9 percent less than enrollment in the basic course for the preceding year. One additional institution converted from required enrollment in the basic course to elective basic course participation by first and second year male college students. Eight of the 13 senior division institutions are now conducting an elective basic course program.

Seventy-six cadets took advantage of the Army ROTC Flight Training Program conducted at eight senior division ROTC units during school year 1963-64. The number of schools conducting the Army Flight Training Program during the school year beginning September, 1964 was 12, an increase of 4. The 12 senior division units now conducting flight training program have 112 cadets enrolled.

ROTC Summer Camp was conducted at Fort Lewis, Wash., 20 June to 31 July. A total of 563 cadets attended camp from this Corps. The Warrior of the Pacific Award was again won against national competition by Seattle University. A collective score of 82.09 won the award this year. The award is presented annually to the school whose cadets fire the highest collective score in the record .30 caliber rifle marksmanship phase of the summer camp training. Selection for the award is made by the Department of the Army.

Twenty-three Army ROTC smallbore, .22-caliber, indoor rifle teams participated in the Sixth US Army Area ROTC Intercollegiate and Interscholastic Indoor Smallbore Rifle Matches. Of this group, four teams were selected to fire in the National Intercollegiate Smallbore Rifle Matches.

The Legion of Valor annual ROTC awards of the Bronze Cross for Achievement in X US Army Corps went to Cadet Major William H. Oldenburg, Boise High School and Cadet Major Bruce C. Leibrecht, Eastern Washington State College.

Active-Duty Training

The ACDUTRA Control Center (ACC) was reactivated on 3 February under the staff supervision of the Assistant Chief of Staff, G3. The Center was staffed with representatives from the G4 Movements Branch and G3 Active-Duty Training Division. The ACC, in its fifth year of operation, was responsible for coordinating unit and individual active-duty training for members of the Ready Reserve under the jurisdiction of X Corps.

Requests for unit ANACDUTRA orders were initiated for 271 USAR troop program units who were ordered to perform ANACDUTRA 1964 at 26 different training sites. The figure of 271 includes split assemblies and units ordered to perform ANACDUTRA on two different dates and sites.

A total of 13,878 Reservists was credited with attending ANACDUTRA 1964 in the following training categories:

	<u>OFF</u>	<u>ENL</u>	<u>TOTAL</u>
a. USAR Troop Program Personnel			
(1) No. attending with assigned unit	1,732	6,542	8,274

g. No. Reservists participating in REP-63 training		<u>1,987</u>	<u>1,987</u>
TOTAL	3,231	10,647	13,878

During 1964, 6,735 individual active-duty training orders were issued which affected approximately 4,400 officers and 4,900 enlisted men. These orders cover training tours such as individual ANACDUTRA, Army service schools, Army area schools and special tours.

The following number of requests for outright waivers and change of ANACDUTRA dates submitted by Reservists assigned non-General Officer Commands were processed as follows:

	<u>APPROVED</u>	<u>DISAPPROVED</u>
a. Requests for outright waivers	50	13
b. Requests for change of ANACDUTRA dates	<u>881</u>	<u>4</u>
TOTAL	<u>931</u>	<u>17</u>

Flight Detachment

The Flight Detachment maintained and operated one U-6A (Beaver) and one U-3D (Seminole) during 1964, completing over 845 total hours of accident and incident free flying in helping to carry out the Corps mission.

Three of the authorized personnel changed duty assignments during the past calendar year due to PCS moves and completion of service tours. At year's end, the detachment was short one officer aviator. The Corps

Aviation Officer was among the PCS moves in July and his replacement arrived in early December.

Some of the more important functions of the flight detachment included monitoring of the College ROTC Flight Training Program, assisting USAR units in accomplishment of annual flight requirements and associated training. The detachment also provides personnel for inspection of unit training and of the civilian contract flying facilities utilized by the ROTC students and USAR aviators.

SECTION II - PLANS AND ORGANIZATION

Organization

The implementation of the US Army Reserve Unit Allocation, Reserve Components Troop Basis FY 64 (U) was accomplished with a minimum of personnel turbulence. The majority of the actions directed by RCTB-64 was initially announced by Department of the Army on 3 December 1964 in a change to RCTB-63, which allocated the 191st Support Battalion, Troop D, 8th Cavalry and the 391st Engineer Company to Sixth Army as a brigade base for the 191st Infantry Brigade. The activation of these support elements was delayed until completion of an extensive study of the 191st Infantry Brigade with a view toward consolidation of all elements of the brigade in the three state area of Montana, Idaho and Utah. A stationing plan to effect the proposed realignment of the 191st Infantry Brigade (Mech) was submitted to higher headquarters on 16 June. The realignment was approved by DA on 28 July. Sixth Army General Orders directing the activation of the 191st Brigade Base units and the relocation and/or inactivation of USAR units in connection therewith, were published on 26 August with an effective date of 1 September.

Headquarters, US Continental Army Command, on 5 February directed that an evaluation be made of the 96th Command Headquarters, Divisional to determine comparative costs of supervision of non-divisional units under the Command Headquarters, Divisional concept as compared with the method of supervision used in the past. The period covered by the evaluation was from 1 October 1963 to 30 September 1964. In addition to

costs, the evaluation included consideration of the benefits, improvements and other savings derived from having such an organization in the US Army Reserve. The evaluation established that the 96th Command Headquarters, Divisional, has demonstrated that it is capable of supervising the administration, training and operation of a large number of widely dispersed non-divisional USAR units of various types and sizes.

A study to determine whether additional USAR units should be assigned to the 96th Command Headquarters, Divisional, was initiated on 27 April. Activation of the 191st Infantry Brigade Base and realignment of the 191st Infantry Brigade (Mech) resulted in the loss of nine non-divisional USAR units assigned to the 96th Command Headquarters, Divisional. The objective of the study was to determine the feasibility of assigning additional USAR units to the Command Headquarters in consonance with its mission and to achieve maximum utilization and effectiveness of its command supervisory capability. The study concluded that an optimum balance of type, size and number of units will be achieved by assigning 10 additional USAR units to the 96th Command Headquarters, Divisional. These units, stationed in Utah, Idaho, Montana and Oregon, were assigned to the 96th Command Headquarters, Divisional, under Sixth Army General Order 149, 6 October 1964, effective 1 October 1964.

Plans

Annex C (Mobilization Expansion Plan (U)) to 6th Army Basic Plan 1962 (U) directed this headquarters to prepare a supporting plan. Annex C (Mobilization Plan), X Corps Basic Plan 1962(U) was published

on 17 January 1964. All USAR troop program units in X Corps were required to prepare and submit new or revised unit mobilization plans not later than 1 September. Annex C (Mobilization Plan), XCH-BP-62(U) was revised on 24 September. This directive required all USAR units to review their mobilization plans and submit necessary revisions thereto not later than 1 December. The advent of Mobilization "CPX ANGRY ARM", makes it imperative that all mobilization plans be complete in every detail.

The X US Army Corps Basic Plan 1962 (U) was reviewed and those portions requiring updating were revised. Appendix 3 (Notification System (U) to Annex C, XCH-BP-62(U), establishing procedures for alerting designated USAR units of impending mobilization, was published 23 September. Appendix 5 (C)(Mobilization Station Troop Program) to Annex C (Mobilization Plan), XCH-BP-62(U), notifying USAR unit commanders of their mobilization stations, was published 18 September. Annex II (S) (Defense Readiness Conditions) (DEFCONS) to XCH-BP-62(U), providing for progressive increases in readiness posture of all X US Army Corps forces for cold, limited and general war condition, was published 27 May. Other annexes to the X US Army Corps Basic Plan 1962 (U) are currently under review and revisions will be published early in 1965.

Operations

Three Joint Chiefs of Staff directed no-notice ROUNDHOUSE exercises were conducted during 1964 (26 March, 22 October and 18 December). Each of these exercises was conducted expeditiously and established that the

X US Army Corps system of notification as pertains to DEFCON communications tests is adequate. Appendix 3 (Notification System (U) to Annex C, XCH-BP-62(U), 23 September greatly facilitated the response to these DEFCON exercises by the headquarters staff and by the sector commands.

A practice alert to test the telephonic communication system between X US Army Corps, Sector Commands, Subsector Commands and 25 selected USAR units utilizing the X Corps notification system was conducted during the period 4 - 6 March. The X US Army Corps Alert System for Notifying Reserve Component Units of Impending Mobilization, was tested on 9 June.

Planning for CPX ANGRY ARM began in September. The basic directive with Annexes A, D and E was completed and issued to participating organizations on 1 November. Annex B (General Plan) was issued on 15 November; subsequently, Annex C (Control Plan) followed on 1 December, which completed the preparatory phase of the exercise. Close coordination with ARNG and USAR components continues in preparation for start of exercise on/about 4 January 1965.

SECTION III - LOGISTICS

Supply

The X Corps subsector supply structure changed considerably throughout the year. This was primarily due to a planned reorganization that was well under way, but halted and discarded due to the DOD announcements of 12 December pertaining to the reorganization of the USAR and National Guard. As personnel changes took place in the X Corps Subsector Supply Offices, hiring "freezes" and consolidations were established to minimize PCS movements. X Corps took the following steps:

- (1) All of Utah being serviced out of one supply office at Salt Lake City.
- (2) Consolidation of Coeur d'Alene Subsector and Spokane Subsector with one supply office at Spokane servicing the new subsector.

Equipment Asset Reporting

Asset reporting under AR 711-5 was further refined. The first annual reconciliation was completed, with a report being forwarded to MIDA on 24 December. X Corps personnel traveled throughout the Corps area in assisting unit personnel in developing accurate asset data listings.

Implementation of Punch Card Requisitioning for USAR Units

A new punched card requisitioning procedure will go into effect for the USAR on 1 March 1965. A training team visited key locations

and gave supply training in the new procedures to approximately 500 active and reserve military personnel and to civilian employees.

Materiel Readiness Program

In July of this year, a major change was made in the Army Equipment Records Procedures, TM 38-750 (TAERS).

The TAERS system is an integrated system designed to fulfill the need at all levels of command for accurate and timely information on every aspect of maintenance, related supply, and the materiel readiness of equipment, both in the hands of the troops and in stock.

Under this system our USAR units are required to maintain the same forms and records as the active Army. One of the major changes was the Materiel Readiness Report (DA Form 2406) which replaced the old Status of Equipment Report (DA Form 2411).

Initially, the Corps units had some difficulty in obtaining the equipment serviceability criteria publications which are used for determining the operational capability of the equipment. Distribution of these ESC publications to USAR units during the year was approximately 80 percent complete.

In conjunction with the TAERS program and in response to the requirement for co-related personnel and materiel readiness, a new Unit Operational Readiness Report (AR 135-8), DA Form 2841, was instituted requiring an overall evaluation of personnel, training and logistics for each USAR unit. A series of presentations was given throughout the Corps sectors to key staff members and unit commanders on the preparation of the report by a team from the Corps G3 and G4

Sections. As a result of these presentations, the first reports submitted by the USAR units were quite accurate. Units reflected a low rating in logistics, primarily because the equipment rating is based on what equipment is on hand against TOE allowances.

Corps Maintenance Program

During the past year the capabilities of the Corps maintenance shops program increased. Three additional area organizational maintenance shops became operational, bringing the total to 12 area organizational maintenance shops and 3 aviation maintenance shops in operation.

The operational capabilities of all shops increased. Sufficient funds were made available to purchase the supplies and spare parts required for daily operations and stockage levels. Requisitions for spare parts for the shops' stockage lists achieved an average of 85 percent fill for the area organizational maintenance shops and an average of 97 percent fill for the aviation organizational maintenance shops. All 42 maintenance technician positions authorized under the present program have been filled.

A technical assistance program has been established to cross-train automotive and mobile equipment mechanics in performing second echelon tests on signal equipment and preparation of second echelon parts stockage lists for signal equipment. This training will increase the "in shop" support being furnished our USAR units in maintenance of their signal equipment; especially in those shops where the density of signal equipment was insufficient to warrant a full-time signal repair technician.

Through the technical and maintenance assistance program, emphasis is being placed on training USAR unit personnel in first and second echelon maintenance to enable each USAR unit to perform all authorized maintenance for which it is responsible and capable of performing.

USAR Facilities

An Armed Forces Reserve Center was constructed jointly by the US Navy and US Army during 1964 at Tacoma, Wash. The Navy assumed host position in the new construction with their portion of the facility rated at approximately 600-man capacity at a cost of \$792,000. The capacity of the USAR portion of the facility is rated at 100-man at a cost of \$72,000. The USAR obtained occupancy during September.

At Tongue Point Naval Station, Astoria, Ore., the USAR acquired government-owned building 19 by transfer from the US Navy. This building, which was designed as a dispensary facility, has been altered at an approximate cost of \$9,000 for use as a USAR center. The building was occupied on 31 August, thereby permitting disposal of the leased facility previously occupied.

Three "high cost" leased facilities were terminated during the year at Bozeman, Mont.; Longview, Wash.; and Moses Lake, Wash. Four "high cost" leased facilities remain in the X Corps area at Klamath Falls, Ore.; Bellingham and Mount Vernon, Wash.; and Plentywood, Mont.

Construction of a 100-man USAR center at Bellingham USAR center at Bellingham, Wash. was started in 1964 and will be completed during 1965. Completion of this facility will also permit termination of the high-cost lease at Bellingham.

Action was initiated to acquire a building excess to the needs of the Post Office Department at Mount Vernon, Wash. It is anticipated that this building will be transferred to the Army for alteration and use as a permanent USAR center.

SECTION IV - COMMUNITY RELATIONS, PUBLIC INFORMATION AND RECRUITING

Throughout the year the Corps maintained aggressive public information, community relations and USAR and ROTC recruiting programs. Some indication of the activity may be gathered from annual statistics which show, for example, that 3,713 news releases were made within the Corps organization, 577 various exhibits and displays, 832 talks to civilian audiences and 3,191 individual achievement or "home town" type stories sent directly to area media.

Assumption of command of X Corps in January by Maj. Gen. W. C. Garrison received excellent news coverage throughout the command. Two Seattle TV stations gave excellent coverage of the assumption of command ceremony. General Garrison's subsequent visits to USAR and ROTC facilities in the five states resulted in extensive local coverage in newspapers, and on radio and TV.

Extensive news coverage was given by the Utah newspapers of the participation by Army Reserve elements in EXERCISE DESERT STRIKE, the largest Army Maneuver to be held on the West Coast in 1964. Included in the operation was the 191st Sep. Inf. Brigade (-) made up of units from Salt Lake City, Provo, Helena, Pleasant Grove, and Holladay. A running account of the activities of these units received excellent play in the home communities. The 382d QM Det. of Medford, Ore. also participated.

In keeping with previous years, X Corps units contributed extensively to the observances of Armed Forces Day in the Northwest. Representative of this participation found several X Corps units

among the 150 entries in the Grand Lilac Festival-Armed Forces Day parade in Spokane, Wash., 16 May. Included were 2d Bn, 416th Rgt; Washington State University ROTC cadets; Eastern Washington State College ROTC band and sponsor corps; Seattle University ROTC "Chief-tain Guard", and the Montana State University ROTC K-Dettes.

Open houses and participation in civic observances were held throughout the five-state area.

At Corps headquarters five Army Reservists, one from each state in the Corps' area, were presented certificates of achievement as "USAR Man of the Year." The presentations were made by the Corps Commander. During their visit, the quintet were special guests at the Seattle Chamber of Commerce Armed Forces Day luncheon and were honored later at the Fort Lawton NCO club.

More than 12,000 persons packed the Seattle High School Memorial Stadium on a warm and sunny Sunday afternoon, 26 July for the U. S. Army's presentation "Pageant of Flags."

The 90-minute military extravaganza, featuring the 3d Infantry Regiment from Fort Myer, Va., traced the history of the American flag with troops, authentic uniforms and martial music. U.S. Senator Henry M. Jackson of Washington presented a plaque commemorating the event to the Commanding Officer of the Fort Myer troops who in turn presented a memento to Seattle. About 450 troops from Fort Myer and Fort Lewis, the Sixth US Army Band from the Presidio of San Francisco, the Thirteenth Naval District Band from Seattle and the 25th Air Division Band from McChord AFB participated in the show.

The pageant was sponsored by the Association of the United States Army, Century 21 Center, Inc., the Seattle Chamber of Commerce and Greater Seattle, Inc., with Maj. Gen. George S. Cook, ARNG-Ret., AUSA, as general chairman.

A special promotional feature utilized the four-man color guard of the 4th Infantry Division in colonial uniforms. They made appearances in the Westlake plaza, mayor's office, two television programs, shopping centers and the Seattle waterfront. They contributed greatly to the promotional effort.

Among the special guests introduced to the very receptive audience were six Medal of Honor winners: Col. Orville E. Bloch, USA; Maj. Benjamin F. Wilson (Army); Robert E. Bonney, (USN); Donald K. Ross (USN); John D. Hawk (USA), and William C. Horton (USMC). They were given a standing ovation.

Others introduced included Lt. Gen. Frederic J. Brown, Commanding General of Sixth US Army; Maj. Gen. J. E. Theimer, Sixth Army; Mr. Benjamin H. Swig of San Francisco, Civilian Aide to the Secretary of the Army for Northern California; Mr. D. Elwood Caples of Vancouver, Wash., Civilian Aide for Washington; Honorable Henry M. Jackson, U.S. Senator from Washington; Honorable John A. Cherberg, Lieutenant Governor of Washington; Acting Mayor Wing Luke of Seattle; General W. C. Garrison, Commanding General of X US Army Corps; General Cook; Maj. Gen. C. E. Hutchin, Jr., Commanding General of 4th Infantry Division and Fort Lewis; RADM William E. Ferrall, Commandant, Thirteenth Naval District, and RADM Richard D. Schaidtman, Commander, Thirteenth Coast Guard District.

The public reception of the spectacular was extremely enthusiastic, the art and amusement editor of one newspaper pointing out that Seattle needed more such pageantry. It was a positive contribution toward creating a favorable public image of the United States Army.

Units and personnel of X Corps participated in Veterans Day observances throughout the Northwest. Army Reserve units participated in parades in Redmond, Ore.; Pocatello, Idaho; Bend, Ore.; Medford, Ore.; Salem, Ore. and Portland, Ore. ROTC cadets took part in ceremonies in Boise and Pocatello, Idaho.

A major observance was the 10th annual Linn County Veterans Day celebration in Albany, Ore. ROTC cadets from the University of Oregon and Oregon State University took part in the annual parade and in other events. The Women's Army ROTC auxiliary from OSU participated and OSU ROTC members served as banquet ushers and an ROTC glee club provided entertainment at the pancake feeds. General Garrison, X Corps Commander, was one of the speakers at the evening banquet that was attended by some 550 local citizens and dignitaries. Nine general officers participated in the Albany celebration. General Garrison also spoke at Seattle's Veterans Day observance at the Seattle Center Plaza earlier in the day.

At a Boise intra-city high school football game, Cadet Major William H. Oldenburg of Boise High School received the Legion of Valor Bronze Cross for achievement in the ROTC. He was the only junior ROTC student selected for the award from the 52 major high school ROTC's in the Sixth Army area and was the first student from Boise High School

to receive the award. The presentation was made by Maj. Gen. John E. Walsh, Idaho Adjutant General. Cadet Major Bruce C. Leidbrecht of Eastern Washington State College, Cheney, Wash. was awarded the Bronze Cross in college ceremonies 6 November. He was the first cadet at EWSC to win this award. Both events received excellent coverage.

Headed by General Garrison, the 10 Army elements in the Seattle-King County constituted the Army Section, Federal Government Division, of the local annual United Good Neighbors campaign. All Army units completed their campaign well ahead of schedule and achieved 123.7 percent of assigned UGN goal, leading all of the Armed Forces. Headquarters X Corps achieved 150 percent of its UGN goal.

Noteworthy during the year was the absence of adverse publicity or accidents or incidents that would reflect unfavorably upon the Corps and the US Army.

Throughout the year, this command placed strong and continual emphasis on USAR recruiting. The program included:

1. Conduct by active Army advisory personnel of a special USAR recruiting school during unit annual training for all unit recruiters and information personnel. In order to assist the instructors and to insure adequate, uniform coverage of the subject, this headquarters developed and distributed a lesson plan to be utilized during the classes.
2. Encouragement of attendance of the Special USAR Recruiting Course 12-R-F16 by unit recruiters. This resulted in attendance of 42 enlisted reservists from X US Army Corps.

3. Placement of unit recruiters on active duty for training with local Active Army Recruiting Main Stations. Aggressive action was taken to insure that all school trained unit recruiting personnel performed ACDUTRA with the local recruiting station and recruited for the unit during the unit ACDUTRA period and, in addition, unit recruiters who were not school trained were encouraged to apply for this type duty in lieu of ACDUTRA with their units. During the fourth quarter, FY 1964, the Corps was given 120 man days for recruiting and unit recruiting personnel were placed on ACDUTRA for the purpose of performance of recruiting functions prescribed in DA Pamphlet 140-2.

4. During June a new system for allocating REP 63 training input quotas to subordinate commands was developed. Under this system, quotas were assigned to general officer commands for all subordinate elements of those commands, regardless of geographical location, and to subsector commands for all non-general officer command units. It was believed that this new system would result in a better recruiting program by making the commanders of general officer commands responsible for their own recruiting and getting them behind the program.

5. Recognition of outstanding unit and individual recruiting effort. Sector Commanders were requested to nominate the best units, insofar as recruiting was concerned, within their respective sectors for the Corps Certificate of Achievement with the result that 14 USAR units received this award. In addition, individuals were awarded the Certificate of Achievement for recruiting during the year.

6. Unit recruiting was made a special subject for inspection during the Annual General Inspection and was included as a special subject during all Corps conferences and briefings of senior commanders.

7. Subsectors were encouraged to design and request printing of recruiting publicity material for local use. Six subsectors requested and received brochures. The Yakima Subsector requested and received a special brochure which included on the back side, a calendar of events at the Central Washington Fair which was distributed at a special recruiting booth manned by unit reservists.

Despite all this effort, a gradual decline in recruiting was noted and since June, this command has been under its quota each month. It is felt that this decline is attributable, primarily, to lowered Selective Service calls and to changes in policies of Selective Service. Although this command will continue to emphasize recruiting so long as this requirement exists, it is believed that results will be disappointing in view of the announced merger of the Reserve and National Guard.

APPENDIX I - USAR STRENGTH REPORT
